Attn: Harbormaster Mike Singleton

Subject: Proposal for Hydraulic Dredging of Grace Memorial Harbor, 2024

Mr. Singleton:

Following is our Proposal for the dredging of your facility. As you know, I was involved with your dredging project during the Spring of 2022. As dredge projects go, yours is a straightforward and as simple as it gets. With your excavation contractor building the spoils area, it is easy enough to place the pipe, launch the dredge and begin dredging.

We will be utilizing a cutterhead suction dredge with the discharge pipe being 8". The pipe will be floated on the water except for the area(s) where we will leave off a barrel or two to facilitate boat traffic in or out of the harbor. All other requirements for this project will be met, with the completion date being on or before the 15th of May, 2024.

We have all the requisite equipment needed to complete this job, including, but not limited to:

- 10" x 8" Ellicott Cutterhead Suction Dredge,

- 8" HDPE dredge pipe,

- 3/4 ton Chevrolet Pick-ups,

- Workboat to support dredging operations,

- Equipment trailer to support dredging operations,

- 8" booster pump (not needed in this application),

- Compact tractor to maneuver/place dredge pipe on land,

- Any other tools/equipment needed to conduct dredging operations.

Our price for your Grace Memorial Harbor dredging job shall be: $ 65,000.00

One half of the total shall be payable upon the acceptance and signing of this proposal. The balance shall be due and payable on May 22, 2024.

Thank you for the opportunity to quote you on this project.

Accepted this day, the _____ of February, 2024.
